

## STERIS Finn-Aqua™ BPS Sterilizers

Providing GMP steam sterilization since 1982

Finn-Aqua BPS Sterilizers are developed for component and terminal sterilization as well as decontamination applications. Models are optimized to facilitate your most demanding GMP pharmaceutical and biotechnology manufacturing applications. Non-GMP research applications are also supported.

Cycle	Application	Pressure	Products
B-Cycle	Component	Vacuum	Hard Goods
BX-Cycle	Component	Vacuum	Hard Goods
C-Cycle	Component	Overpressure	Liquids
CX-Cycle	Component	Overpressure	Liquids
SAMX-Cycle	Terminal	Overpressure	Liquids
DEC F	Decontamination	Vacuum	Waste/Hard Goods
DEC V	Decontamination	Vacuum	Waste/Hard Goods
AC-Cycle	Terminal	Overpressure	Liquids
RP-Cycle	Terminal	Overpressure	Liquids

Cycle Type	Total Cycle Time
B-Cycle	Starting from 50 minutes
BX-Cycle	Starting from 40 minutes
C-Cycle	Typically 150 minutes 
CX-Cycle	Typically 120 minutes 
SAMX-Cycle	Typically 90-120 minutes
DEC F	Typically 90 minutes 
DEC V	Typically 90 minutes 
AC-Cycle	Typically 90 minutes 
RP-Cycle	Typically 60 minutes 

## Finn-Aqua BPS Sterilizer Highlights

- Offerings for GMP pharmaceutical and biotechnology manufacturing and research applications
- Conformance to applicable sections of Current Good Manufacturing Practices (cGMP) and current Good Automated Manufacturing Practices (cGAMP)
- CE marked equipment
- Multiple chamber configurations (300-liter to 10,000-liter) available
- Wide range of proprietary cycle options to choose from
- Conformance to applicable sections of EU Annex 1 and EN 285 requirements
- Electronic data security for compliance with 21 CFR Part 11 requirements
- Optional Modular Electric Steam Generator selection (ESG)
- Cascade Jacket Cooling process option for eliminating all cycle water consumption
- VIRASURE™ Air Decontamination System available for demanding high containment applications for biosafety levels 2, 3 and 4
- Comprehensive GMP documentation to support installation, operation and performance qualification of equipment
- Cycle development and product feasibility testing services
- On-site, virtual or hybrid Factory Acceptance Testing services
- Integrated, global support from STERIS Life Sciences
